the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million (19.5% of the population).

There are a number of reasons for this increase. The most important is that the life expectancy of people in the UK has increased. In 1990, the average life expectancy of a male was 74.5 years and of a female 78.5 years. In 2000, the average life expectancy of a male was 77.5 years and of a female 81.5 years.

Another reason for the increase is that the number of people who are aged 65 and over has increased in all countries of the world.

The number of people in the UK who are aged 65 and over is expected to continue to increase in the future.

By 2010, the number of people in the UK who are aged 65 and over is expected to be 15.5 million (22.5% of the population).

By 2020, the number of people in the UK who are aged 65 and over is expected to be 17.5 million (26.5% of the population).

By 2030, the number of people in the UK who are aged 65 and over is expected to be 19.5 million (29.5% of the population).

By 2040, the number of people in the UK who are aged 65 and over is expected to be 21.5 million (33.5% of the population).

By 2050, the number of people in the UK who are aged 65 and over is expected to be 23.5 million (37.5% of the population).

By 2060, the number of people in the UK who are aged 65 and over is expected to be 25.5 million (41.5% of the population).
